

PŪRA CHLORLOCK. Product Manual.

PŪRA ChlorLock is the safest and most effective way of neutralizing chlorine and bleach in all fresh and salt-water aquarium applications. It also the most cost effective way of preparing aquarium and pond water.

Dechlorinating Tap Water:

One level teaspoon (tsp) of PŪRA ChlorLock crystals treats 250 gal of municipal tap water. Prepare stock dechlorinating solution by dissolving one level tsp of crystals in 1 oz (30 ml) of water. Use at a rate of two drop solution per one gal of tap water.

For very large aquariums and ponds, appropriate amount of PŪRA ChlorLock crystals can be dissolved in a cup of water and entire cup poured into aquarium or pond.

Safe Ornament Bleaching:

Bleach decorations in a solution of one part household bleach and three parts water for a few hours. Remove decorations from bleach solution and rinse thoroughly. Place bleached decorations into fresh tap water and add two level table spoons (TBS) of PŪRA ChlorLock crystals per 5 gal of water. Keep decorations in this neutralizing solution for at least 4 hours.

Rinse decorations in fresh water and if no bleach odor can be detected it is safe to place them back into aquarium. If bleach odor can be detected return decorations to a freshly prepared PŪRA ChlorLock solution to soak for a few more hours.

For aquarium use only. Keep out of reach of children! Do not take internally. In case of skin contact, wash skin with plenty of soapy water. Flush with plenty of water in case of eye contact and consult a physician.
