

Tech Facts

**PŪRA CARBON. Product Manual.**

PŪRA Carbon is an acid washed, virgin, activated carbon made from the highest select grades of bituminous coal and specifically designed for liquid phase applications. PŪRA Carbon has high adsorption capacity, low ash content and maintains high resistancy to mechanical degradation.

**Directions:**

Place desired amount of PŪRA Carbon into enclosed media bag, rinse under tap or RO water and place inside any filter. For best results replace monthly.

PŪRA Carbon is a phosphate free reef grade activated carbon with typical applications including aquarium systems water purification, removal of chlorine, dissolved organics, residual medications, taste, odor and color.

**For aquarium use only.** Keep out of reach of children! Do not take internally. Flush with plenty of water in case of eye contact and consult a physician.
